

# Index

The index contains relevant sites and spatial formations from the study of Sthalamāhātmyas on Kanchipuram. According to the style used in this book (see notes on transliteration on p. xiii), the spelling of the toponym indicates whether the particular name refers to a place mentioned in the source texts (Sanskrit name) or to an actually existing, historical site (modern Tamil name). As a rule, the name of the historical site is taken as keyword in this index, the name(s) of the place mentioned in the primary sources follow and are given in slanted style for further distinction. If there are variant names across the texts for the same place, they are ordered by frequency of occurrence. A comprehensive listing of the places mentioned in the Sthalamāhātmyas on Kanchi can be found in the appendix of this book.
