'typical' behaviour of flows, 97
Gottes Zeit ist die allerbeste Zeit, 37

A. Einstein, 4
A. Sakharov, 73
age of the Universe, 47
associated statistical uncertainty, 149
autoparallelity condition, 14

baryon acoustic oscillation, 145
baryons such as protons and neutrons, 73
Bayes-theorem, 149
Big Rip, 51
Biot-Savart, 101
Bose-Einstein-statistics, 70

CAMB notes, 155
canonical partition function, 152
Cauchy-Schwarz inequality, 128
Christoffel-symbol, 11
COBE-satellite, 63
conformally flat, 35
congruence, 23
continuity equation, 93
cosmic inflation, 77, 78
cosmic microwave background, 134
cosmic variance, 149
cosmological horizon, 54
cosmological principle, 1
cosmology question of the week, 155
covariant derivative, 13
Cramér-Rao inequality, 153
cumulants, 152

David Lovelock, 37
de Sitter, 54
deceleration parameter, 36
diffeomorphism, 9

E. Hubble, 33
Eddington's Solar eclipse from 1919, 142
Einstein-Hilbert-Lagrange density, 37
energy-momentum tensor, 25
equation of state, 27, 99
Etherington-relation, 47

Faber-Jackson relation, 145
Fermi-Dirac-statistics, 70
first law of thermodynamics, 7
Fisher-matrix, 152
FLRW-metric of a flat space, 34
formalism for achieving this, 122
Friedmann-Lemaître-Robertson-Walker models, 1
Frobenius norm, 24

Gauß-theorem, 2
geodesic deviation, 19
geodesic equation, 15
Gibbons-Hawking temperature, 79

Helmholtz free energy, 152

integrated Sachs-Wolfe, 140

Jeans-length, 100

Kretschmann-scalar, 21

Lamé-coefficients, 97
least squares-rule, 148
Legendre-polynomials, 131
Leibniz-rule, 27
lensing by the cosmic large-scale structure, 143
Levi-Civita connection, 14
light cone, 50
Lovelock, 37

maximally symmetric spacetimes, 54
maximum likelihood, 148
metric, 9
metric compatibility, 13
Metropolis-Rosenbluth-Hastings algorithm, 150
MO(dified) N(ewtonian) D(ynamics) theories, 114
Modern cosmology, 1

Navier-Stokes equation, 93
neutron stars, 78
Newtonian gravity, 2
non-baryonic dark matter, 120
nucleosynthesis in the early Universe, 74

Pearson correlation coefficient, 128
Planck-system, 78
Poisson-equation, 2, 3
pressure, 96

quintesence, 81

random fields, 127
Raychaudhuri-equation, 22
recession motion, 1
recombination, 70
relativistic photons for probing gravitational potentials, 117
Ricci-tensor, 21
Riemann-curvature, 17
Riemannian geometry, 14
rotational velocity v does not depend on radius r anymore, 114

Saha-equation, 70
Shannon-entropy, 152
shifted towards the red or rather to lower energies, 39
singular isothermal sphere, 114
Spacetime, 9
spaghettification, 22
spherical harmonics, 131
static coordinates, 54

thermal ensemble of photons, 60
thermal Sunyaev-Zel'dovich effect, 139
torsion-free, 13
Tully-Fisher relation, 145

variational principle, 2
virial theorem, 116
viscosity, 96
vorticity, 100
vorticity tensor, 100

weak energy condition, 29
Wick-theorem, 149

Yukawa-screening, 5

Zel'dovich-approximation, 113
