INDEX

A. Eddington, 18
A. Einstein, 1
affine transformations, 4
algebraic Bianchi-identity, 77

Baker-Hausdorff-Campbell-formula, 10
Bertrand's theorem, 5
Birkhoff-theorem, 93, 120

centrifugal force, 39
Christoffel-symbol, 26
conformally flat, 83
congruence, 85
connection are interpreted as independent fields, 152
continuity equation, 69
Coriolis-force, 39
cosmological constant, 3, 121
cosmological principle, 111
Cotton-tensor, 84
Coulomb-potential, 3
covariant derivative, 26, 27
critical density ρ_{crit}, 120

d'Alembert, 15
D. Lovelock, 77
dark energy, 125
diffeomorphism, 21
differential Bianchi-identity, 78
dispersion, 15
Doppler-effect, 15
dual tensor, 82

Eddington-Finkelstein coordinates, 100
eikonal or geometric optics, 98
Einstein-Hilbert-Lagrange density, 149
Einstein-tensor, 52
elliptical geometry, 22
energy condition, 44
energy momentum tensor, 70
equivalence principle, 24
Euler-Lagrange-equation, 2
event horizon, 116

Finsler geometries, 37
four metric axioms, 22
Friedmann-equations, 119
Friedmann-Lemaître-Robertson-Walker, 111
Frobenius norm, 86, 143

G. Galilei, 4
general relativity is unique, 77
geodesic, 31
geodesic congruence, 43
geodesic deviation, 41
Geoffrey A. Landis, 43
gravitational constant, 3
gravitational field equation, 78
gravitational light deflection, 18
gravitational wave memory, 132
gravitational waves, 131
Green-function, 86

Hamilton's principle, 2
horizon, 113
hyperbolic evolution, 22
hyperbolic geometry, 22

I. Newton, 1
ideal fluid, 70

Jacobian, 25

K. Schwarzschild, 89
Kepler's third law, 4
Killing-equation, 47
Killing-vector, 46
Kretschmann-scalar, 52
Kruskal-coordiantes, 101

Lagrange-density, 2
Legendre-transform, 13
Levi-Civita connection, 49
Levi-Civita-connections, 28
light cone, 22
linearisation for curvature tensors, 129
Lorentz-algebra, 10
Lorentz-factor, 7
Lorentz-force, 14

Mach's principle, 40
Maxwell's equations, 17
metric compatibility, 28
metric tensor, 21

new derivative, 44

OJ 287, 5
Ostrogradsky-theorem, 2

Painlevé and Gullstrand, 96
Palatini-identity, 150
Parallel transport, 26
parallelogram, 29
partial derivatives, 26
particle horizon, 116
Pauli-matrices, 9
perihelion shift of Mercury, 1
Poisson-equation, 1
proper time, 8
PSR 1913+10, 5
PSR J0737-3039, 5

quadrilateral, 29
quintessence, 123

Raychaudhuri-equation, 43, 84
redshifted, 115
Reissner-Nordström, 104
relativistic Doppler-effect, 34
retardation, 134
Ricci-curvature, 52, 81
Ricci-scalar, 52
Riemann curvature, 49
Riemannian geometry, 28
rotational flattening, 40

S. Lie, 44
scale-invariant, 3
Schouten-tensor, 84
Schwarzschild-radius, 91
spaghettification, 43
special relativity, 1
subtleties, 145

tangent space, 25
tensor d'Alembertian operator, 47
topological structure, 21
torsion-free condition, 30

Variational principles, 143

W. Killing, 46
wave equation, 136
Weyl-tensor, 81

Yukawa-form, 3
